

PRESS RELEASE

Gel documentation, densitometry and analysis with GLP conformity

The Herolab E.A.S.Y® Doc Plus gel documentation system is the most popular system in the range of imaging products for gels and blots. With over 20 plus years of experience in this ever growing field, Herolab have become one of the leading manufacturers in this technology.

German based Herolab have been producing scientific laboratory products since 1979 and are synonymous with high quality and user-friendly designs. The E.A.S.Y® Doc Plus has been sold to customers world-wide and continues to attract new users. The exceptional life cycle of the product is proof of its durability and quality.

Recently a new generation of scientific grade CCD camera was added to the E.A.S.Y® Doc Plus which further enhanced the already high specification. The use of this new camera together with a light sensitive zoom lens allows rapid detection of even the smallest sample amounts giving users a new level of performance.

One of the key features of the E.A.S.Y® Doc Plus is its modular design. The concept not only allows for easy handling and use but it also means the user can adapt their system for just the right configuration for their imaging applications. It is also possible to use any of the components to provide an individual solution if required.

Another plus point for the E.A.S.Y® Doc Plus is that it can be connected to most computer systems. Software is provided for image capture as well as the renown E.A.S.Y® Win analysis package which has proven to be one of the best packages of its type for gel and blot analysis.

Says Herolab: "This is the most popular gel documentation system that we sell because of its versatility, quality and value for money"
