## **PRESS RELEASE**

### **An extensive range of UV Products from Herolab**

Herolab GmbH Laborgeräte of Wiesloch in Germany manufactures products for Life Science research, diagnostics and production. For the past 36 years the Company has produced a range of exciting products. Alongside the well-known centrifuge and gel documentation ranges is also the UV products division.

The UV products division has a number of key products that are used in life science and general laboratories as well as for industrial applications. These include a wide range of UV and blue light transilluminators. In fact Herolab make over 100 different versions which are all made to a very high standard and offer a choice of wavelength and filter size and material. There really is a solution for everybody when it comes to selecting the right transilluminator.

When it comes to hand lamps once again the extensive Herolab range offers something for everyone. The range starts with small bench top lamps and goes right up to larger industrial size germicidal lamps. There is a wide range of lamp power and wavelengths covering short, medium and long wave UV.

PCR Workstations and Crosslinkers are also offered again with a choice of features and sizes to meet all requirements.

The range is naturally built to the highest standard by Herolab. Each product meets all the current safety standards and will give many years of service. Herolab have also managed to keep prices at a very competitive level.

Says Herolab: "Over 36 years we have developed a wide range of UV products. If you do not see what you want we are also happy to discuss custom built products to your specifications"
